BOOK SYNOPSIS

Hanns Ullrich, this highly renowned legal scholar, has had a tremendous influence on legal research and the development of the law in the fields of both Technology and Competition. His expertise dates back to the late 1970s and early 1980s, when he served as a member of the research staff at the Max Planck Institute for Intellectual Property in Munich. In 1985, he became professor of law at the "Universität der Bundeswehr", Munich, and finally, in 2000, professor at the European University Institute, Florence. He has acted as visiting professor at a number of Universities around the world including, in particular, the College of Europe, Bruges. The authors of the contributions in this book feel greatly indebted to Hanns Ullrich. Much earlier than others, he recognised and explained that, in the absence of pressure from competition, intellectual property will not be able to fulfil its mission of enhancing innovation. In concentrating on the fields of interest of this eminent scholar, the contributions address a number of the most burning issues of the regulation of intellectual property, competition law and, of course, the application of competition law to IP-related cases. • • • • • Hanns Ullrich - ce grand juriste universitaire - a eu un impact énorme sur les sciences juridiques et le développement du droit dans les matières de « Technologie et concurrence ». Son expertise s'est développée à partir des années 1970 et 1980 qu'il a passées comme membre du groupe de recherche à l'Institut Max Planck pour la propriété intellectuelle à Munich. En 1985, il a poursuivi sa carrière comme professeur en droit à l' « Universität der Bundeswehr » à Munich et finalement, à partir de 2000, à l'Institut universitaire européen de Florence. Il a aussi agi - comme professeur invité - dans de nombreuses universités du monde entier et en particulier au Collège d'Europe de Brugge. Par ces mélanges, les auteurs témoignent leur reconnaissance envers Hanns Ullrich. Bien avant les autres, il a compris et expliqué que, sans les contraintes qu'impose la concurrence, la propriété intellectuelle à elle seule ne sera guère capable de répondre à sa vocation d'inciter à l'innovation. En se concentrant sur les matières sur lesquelles porte l'intérêt de cet éminent juriste, les contributions qui sont présentées dans cet ouvrage discutent sur une quantité de thèmes les plus ardents en propriété intellectuelle, droit de la concurrence et, bien sûr, ce qui concerne l'application du droit de la concurrence sur la propriété intellectuelle.
